

Physician Advisor-Medical Director Care Coordination

Position Summary

The Medical Director is a key member of the hospital's Care Coordination team. This position serves the hospital through teaching, consulting and advising both the care coordination department and the hospital on matters regarding physician practice patterns, over and under utilization of resources, medical necessity, compliance rules and regulations and payer collaboration. The Care Coordination Medical Director partners with Hospital leadership and attending medical staff to develop and implement methods to optimize use of hospital services for all patients. This position is responsible for managing the efficiency of care delivered, and assisting the organization physician practices in order to achieve desired resource management and quality goals.

- MD/MO, Board certified
- Three to five years experience in a hospital wide position involving quality management, utilization review, resource management, or medical staff governance.
- Skilled in negotiation and conflict resolution
- Ability to build rapport with medical staff and management leadership to obtain necessary approvals of new strategies for utilization management.
- Knowledge of current medical literature, research methodology, healthcare delivery systems, healthcare financial/reimbursement issues, and medical staff organizations.
- Dedication to the delivery of high-quality, cost-effective, efficient patient care services.

Wake Forest Baptist Health is an affirmative action and equal opportunity employer with a strong commitment to achieving diversity among its faculty and staff.
